Water Management Policy

INTRODUCTION

Water, which is vital for sustenance of life and economic development is becoming an increasingly scarce resource. The planning and execution of water resources development have by and large been carried out individually. Water conservation is an integral part of ensuring an adequate water supply across the state, now and into the future. It is the least expensive strategy for meeting our water needs and should be the first choice for communities to protect their local water resources.

OBJECTIVE POLICY

The purpose of this policy is to ensure the college operates in a sustainable manner managing water consumption by using water efficiently, wisely and responsibly. This policy contributes to meeting the college authority's commitments and goals with respect to water-related costs.

MAJOR INITIATIVES

- This policy supports and enhances the college commitment to environmental sustainability and encourages change in individual behaviors, actions, and campus processes.
- water use can be managed by all departments, colleges and units through awareness and adoption of the most efficient procedures and practices.

WATER CONSERVATION POLICY

- Reducing water consumption and protecting water quality shall be the key objectives of college.
- Student and staff engagement play a major role in our water sustainability strategy.
- The college is implementing water-efficient fixtures in its new constructions in campuses, ensuring 100% treatment and recycling of sewage and rainwater harvesting.

ACTIONS PLAN

- Develop research processes that are efficient and use resources wisely.
- Report water leaks to Customer Service Centre.
- Develop engagement and awareness programs with regular publicity campaigns.
- Provide incentives to students and staff for efficient water use and conservation.
- Provide training on the water conservation measures adopted by the college to all the students, staffs and other stakeholders of college and nearby community.
- Ensure awareness about the water conservation policy of the college among all the stakeholders.
- Establishment waste treatment and recycling centres.
- Use rainwater effectively.
- Make effective use of soil water reserves
- Take measures to avoid run of
- Avoid wasting water through evaporation
- Reduce water losses through drainage

WATER CONSERVATION POLICY

- Plan your irrigation
