7. Purpose / aim / objective and outcome of the event:
 - Yoga is essentially a spiritual discipline based on an extremely subtle science, which focuses on bringing harmony between mind and body. It is an art and science of healthy living. The word 'Yoga' is derived from the Sanskrit root 'Yuj', meaning 'to join' or 'to yoke' or 'to unite'. As per Yogic scriptures the practice of Yoga leads to the union of individual consciousness with that of the Universal Consciousness, indicating a perfect harmony between the mind and body, Man & Nature. According to modern scientists, everything in the universe is just a manifestation of the same quantum firmament. One who experiences this oneness of existence is said to be in yoga, and is termed as a yogi, having attained to a state of freedom referred to as mukti, nirvana or moksha. Thus the aim of Yoga is Self-realization, to overcome all kinds of sufferings leading to 'the state of liberation' (Moksha) or 'freedom' (Kaivalya). Living with freedom in all walks of life, health and harmony shall be the main objectives of Yoga practice."

In military weddings, especially those of commissioned officers, guards, composed usually of service members of the same branch, form the sabre arch. The purpose of blood donation camp to select a suitable donor whose blood will be safe to the recipient and who himself shall not in any way be harmed by blood donation. Organization of blood donation camp should be best and safe to the patient/recipients and to the blood donor. With increase in population and development of more advanced medical and surgical procedures, the need for blood is ever increasing. Only voluntary blood donors can help to maintain an adequate supply of blood to save the lives of those who are in need. Conducting voluntary blood donation camp efficiently and regularly will provide adequate round the clock availability of blood units during emergency situation and they are the sources of safe blood also. By donating blood, one gives a second chance of life to someone unknown. Donating blood may reduce the risk of heart disease and stimulate the generation of red blood cells. There is no substitute for human blood. It can be acquired only from a generous blood donor.
