### 5.2. OJT Records and letters. - Yes

The College maintains comprehensive and well-organized On-the-Job Training (OJT) records to ensure systematic documentation and monitoring of student training activities. Each department keeps detailed registers and digital records that include student lists, allotted industries, duration of training, training objectives, attendance, and copies of OJT completion certificates. Departments also collect and preserve student activity reports, daily logs, evaluation sheets, and feedback forms from industry supervisors. This structured record-keeping not only ensures transparency and accountability but also helps assess the learning outcomes, skill acquisition, and overall effectiveness of the OJT programs. These records are continuously updated and reviewed as part of academic audits, accreditation processes, and departmental evaluations.

In addition to maintaining records, the college manages all official correspondence related to OJT, including letters, approval notes, and communication documents exchanged with industries and institutions. Each department issues OJT request letters, permission letters, and nomination letters to students, facilitating smooth coordination between the college and industry partners. After completion of training, students submit appointment letters, completion certificates, and industry-issued experience proofs, all of which are preserved for verification and reporting purposes. These well-maintained OJT letters and documents strengthen institutional credibility, support NAAC and regulatory submissions, and reflect the college's commitment to providing students with meaningful industry exposure and experiential learning opportunities.
